Allowing Cisco AnyConnect to coexist with AVG
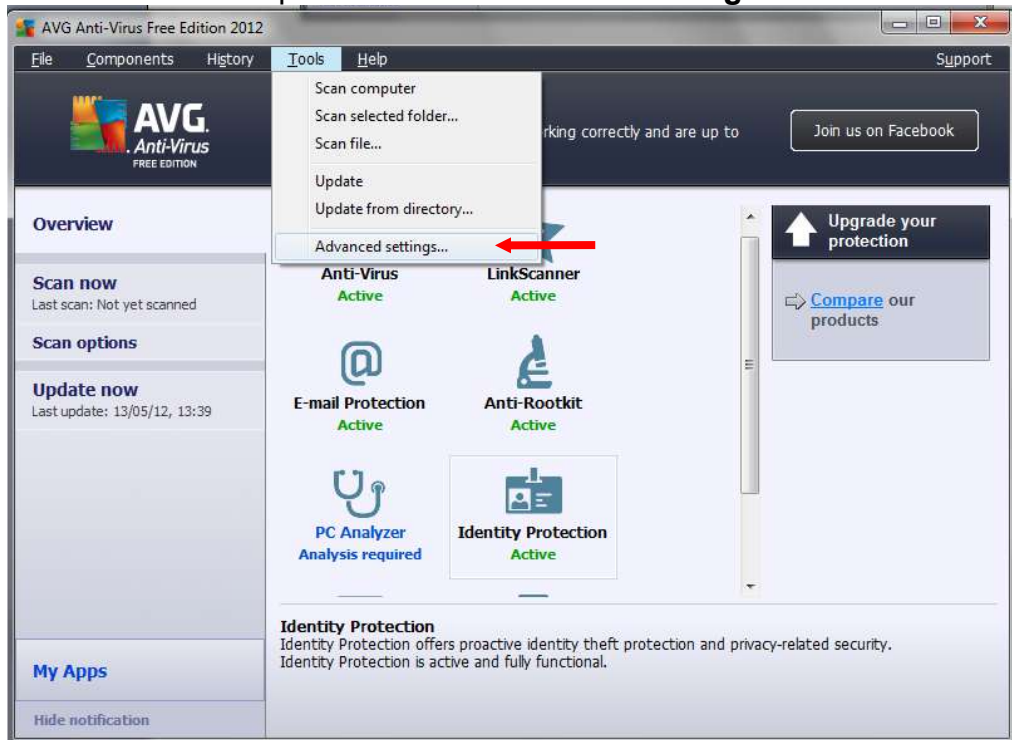

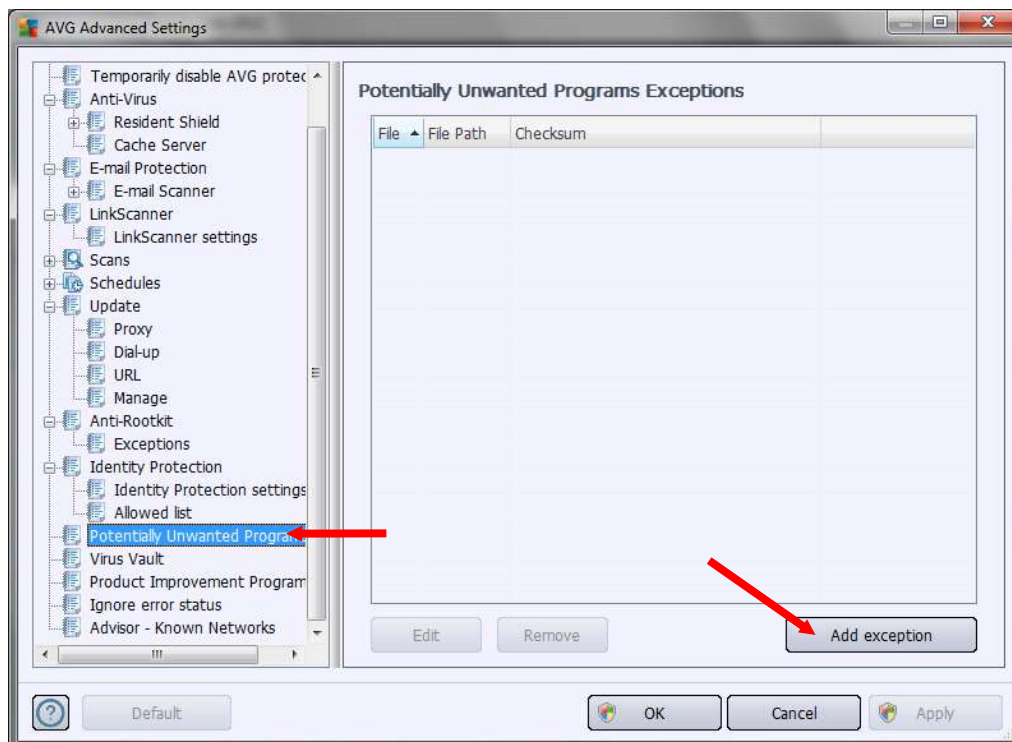

Launch AVG and open **Tools → Advanced settings**

Choose **Potentially unwanted programs** from the items on the left and click the **Add exception** button.

Enter the path to the VPN client;
x64 systems:
```
C:\Program Files (x86)\Cisco\Cisco AnyConnect Secure Mobility Client\vpnui.exe
```
**32 bit** systems:
```
C:\Program Files\Cisco\Cisco AnyConnect Secure Mobility Client\vpnui.exe
```

Click **Add**

Click **OK**.

Restart Cisco AnyConnect and it should now connect properly.

You may need to repeat this process after AnyConnect updates.
